

This is My Business.

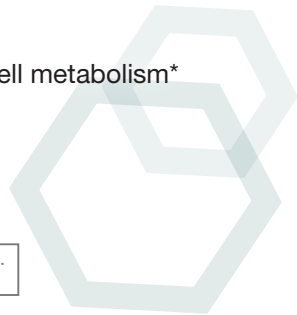

FuCoyDon  
UFG

**Features and Benefits**

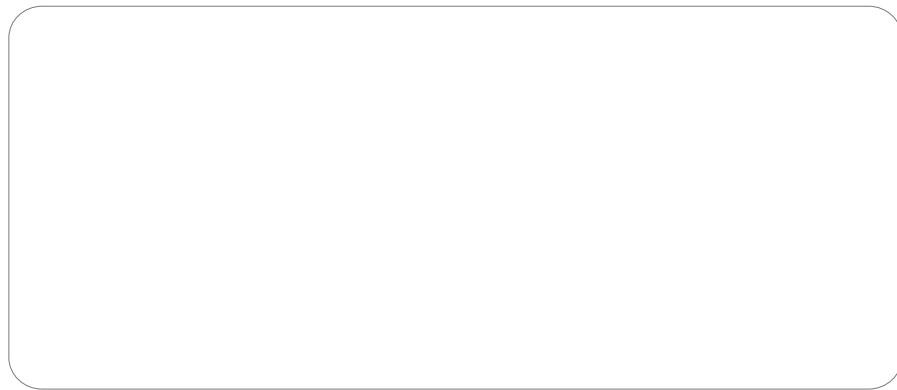

FuCoyDon UFG may provide healthy nutrition to support:

- Liver function\*
- Immune system activity\*
- Circulatory function\*
- Neurological systems\*
- Energy production and cell metabolism\*
- Digestive function\*

**Helping You Live a Richer Life.**

Find out how to get your product at no cost to you by contacting the person who shared this brochure with you.

## The Story of FuCoyDon UFG

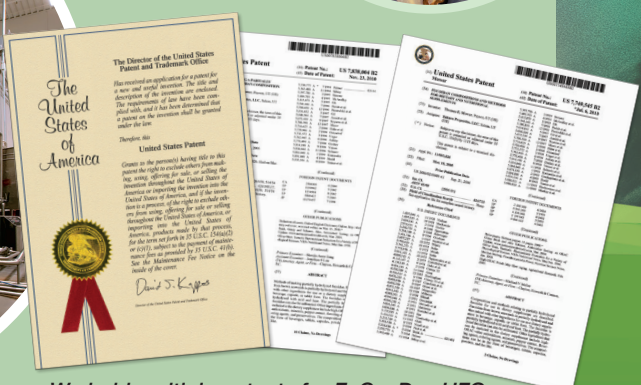

In 1988, Tom Mower Sr. was introduced to an amazing ingredient called Virgin Mother's Milk that was purported to have myriad health benefits. After using this ingredient for a few weeks, he started feeling more awake, more refreshed, and more energetic throughout the day. He knew he had something special on his hands.

Tom's search landed him in Tonga where this miracle ingredient turned out to be none other than Fucoidan harvested from Limu Moui brown seaweed, used for centuries in Tonga, Japan, and other areas of the South Sea because of its regenerative properties.\* When he was told that producing an effective, concentrated Fucoidan solution would be a prohibitively expensive endeavor, he was undeterred by the challenge. In fact, Sisel was founded by Tom and his son Tom Jr. in part to create his innovative process and bring **FuCoyDon UFG** to the world.

Sisel developed a patented process to 'sulfonate' all eight molecules of the fucoidan species, making it highly effective (most fucoidan species have only one of the eight molecules). Sisel also invested over 3.5 million dollars constructing the only Limu Moui spray dryer in the world.

Spray Dryer

We hold multiple patents for FuCoyDon UFG.

## Patented. Powerful. Unparalleled.

Fucoidan's primary function in Limu Moui seaweed is to protect it against external stresses like salt, wind, ultraviolet radiation, and other harsh elements. Just like seaweed and plants, our bodies experience many external stresses throughout our lives, and the same properties in fucoidan that protect seaweed from harsh elements can also be used to protect the human body.

Fucoidan's regenerative and restorative properties help cells in plants, animals, and humans expel toxins, reproduce, and repair themselves.\* Supporting the body's cells in turn supports the body's systems and functions, including a healthy immune system, metabolism, circulatory function, digestive health, anti-aging properties, energy production, and more.\*

*Dazzling Health from the Sea in Every Bottle*

## The Synergistic Science of FuCoyDon UFG

Every system in the body is dependent on a foundation of specialized cells, which expel toxins, support regeneration, and repair themselves. However, as they age, a lack of proper nutrients, pollution, exposure to harmful chemicals, and genetic mutations all combine to interfere with normal cell functions.

**FuCoyDon UFG** contains active ingredients that work synergistically with Fucoidan to assist cellular regeneration and signaling, provide antioxidant support, and reinforce the health of nearly every system in the body.\*

Fucoidan's many health-promoting ingredients have been thoroughly studied by the scientific community. Fucoidan has over 1,700 studies featuring proven research on its health-supporting benefits. Many of these can be found at [www.pubmed.gov](http://www.pubmed.gov).
