Supercharge and Fortify Your Immune System.

The **InFLUence** arsenal of powerful, targeted ingredients provides massive support to supercharge and fortify your immune system. Elderberries contain anthocyanins, flavonoids that possess an ability to act as free radical scavengers that may protect many of your body's systems. Furthermore, the lactoferrin in InFLUence supports increases of immature neutrophils, which can support your ability to naturally eliminate harmful cells.

In vitro, Curcumin has been shown to enhance the power of T cells, B cells and natural killer cells (types of white blood cells known as lymphocytes), macrophages, "big eaters", which engulf cellular debris. Star anise has a naturally abundant supply of shikimic acid which has a long history of herbal use in many cultures throughout the world.

This arsenal of powerful ingredients provides massive support to supercharge and fortify the immune system:

- **Anthocyanins** are flavonoids that protect many body systems.
- **Lactoferrin** supports the enhancing of immature neutrophils in humans, which may help with microorganisms.
- **Curcumin** provides support of T cells, B cells, and natural killer cells (types of white blood cells known as lymphocytes), macrophages ("big eaters" which engulf and digest cellular debris and pathogens), and neutrophils.
- **Star Anise** has a naturally abundant supply of shikimic acid and a long history of herbal use in many cultures.
- **Quercetin** is a flavonol that possess an ability to act as a free radical scavenger and powerful immune supporter.
- **Zinc** supports cell-mediated immunity.
- **Selenium** nutritionally supports the body's natural defence cells, promoting strong immune system performance.
