

SiselKAFFÉ™ — Premium Ground Coffee

sisel

F133515-10-01

Superior Tasting, Ultra-Rich, Ground Health Coffee

At Sisel, we're passionate about producing the best tasting and healthiest coffee available. We pride ourselves on using only the best beans and roasting methods, no matter the cost. Coffee enthusiasts will know after the first sip that **SiselKAFFÉ™ Premium** is the coffee that most people will love. They will then not settle for anything less.

We start with first-rate ingredients. The award-winning Panamanian Boquete coffee blend is nourished by a perfected mixture of high altitude, sun exposure and humidity. The coffee also has added Chaga, Ganoderma, Bacopa and Gotu Kola. Chaga contains B-vitamins, flavonoids, phenols, minerals and enzymes to support the immune and digestive systems. Ganoderma and Chaga are ancient mushrooms used in traditional Chinese medicine to support longevity. Bacopa is added to lend support for memory. The leaves and stems of Gotu Kola have a long history of supporting respiratory health.

Our manufacturing process is kept entirely in-house. We process the world's best beans using special infrared technology. Only a very small percentage of all the coffee beans in the world are prepared with infrared processors, and we're proud to say ours are in that elite group. It results in lower acidity levels and more evenly roasted beans, without the burnt or bitter taste some coffee roasting procedures produce.
