

# SiselSilver™ Serum

## Micronized Colloidal Silver

The topical application of silver has a long history of use. Colloidal silver has historically been used for its antibacterial, antiseptic, and antimicrobial properties associated with wounds, injuries, and burns.

SiselSilver Serum helps keep skin looking and feeling healthy while supporting skin's natural resiliency and repair processes. This topical application combines the power of science with the healing properties of nature. A unique serum formulation utilizes micronized colloidal silver, which works naturally by adding additional healing defense to the skin. It helps calm irritated skin and helps treat sensitive areas. SiselSilver Serum also includes hyaluronic acid, a compound found naturally in the body that is considered integral due to its capacity to attract and hold 1000 times its weight in moisture, therefore providing essential hydration and increasing moisture levels in the skin.

SiselSilver utilizes a proven, new technology that magnifies the power and efficacy of silver. This unique and effective micronized colloidal silver core is surrounded by an  $\text{Ag}_4\text{O}_4$  Tetrasilver tetraoxide molecular coating. This technology promotes continuous particle function to maximize bioavailability and potency. Unlike traditional ionic silver, our micronized colloidal SiselSilver with its  $\text{Ag}_4\text{O}_4$  coating includes millions of silver oxide molecules attached to a central silver particle. These millions of molecules can ensure our superior silver functionality is reproduced time and time again to maximize the benefits people are looking for when using silver.

A powerful  
combination of  
science and  
nature for  
better health  
and wellness

## FEATURES AND BENEFITS

- 25 ppm (concentration is 25 parts of silver per million parts of water)
- Designed to be effective in supporting, maintaining, and adding additional healing defense to the skin
- Micronized silver particles with  $\text{Ag}_4\text{O}_4$  Tetrasilber tetraoxide coating means continuous particle function to maximize bioavailability
- Micronized colloidal silver is supported by human clinical studies and toxicity studies
- Includes hyaluronic acid, a glycosaminoglycan found naturally in the skin that is part of the skin's youth-supporting matrix
- Made with RO (Reverse Osmosis water) for utmost purity
- Topical silver has been used throughout history for its beneficial properties
- Sisel Safe formula includes all natural ingredients and is preservative free

## DIRECTIONS

Dispense several drops onto fingertips and apply to skin as needed.

## CAUTION

For external use only. Avoid contact with eyes. Keep out of reach of children. Do not use if tamper-evident seal is broken. Discontinue use if there is an adverse reaction.

**Manufactured for:**  
**Sisel International, LLC**  
P.O. Box 369, Springville, UT 84663

**Sisel International AG**  
Grundacher 5  
6060 Sarnen, Switzerland

# SiselSilver<sup>TM</sup> Serum

Micronized Colloidal Silver

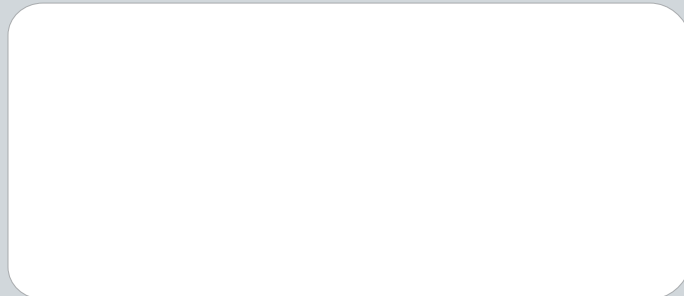

NET WEIGHT: 30 mL (1 fl oz)

**INGREDIENTS:** Colloidal Silver (Micronized), Butylene Glycol, Xanthan Gum, Hydrolyzed Hyaluronic Acid.

Per USP <51> standard testing, SiselSilver Serum has been evaluated and shown to reduce the levels of common microorganisms and fungi including:

- Staphylococcus aureus
- Escherichia coli
- Pseudomonas aeruginosa
- Candida albicans
- Aspergillus brasiliensis
- MRSA
