

Aligning the power of nature and the advancements of science, Natrience is clean, customized skin care formulated just for you and your skin's specific needs.

Go Clear Multi Acid Clarifying Boost

Clarifies Skin Tone • Reduces the Appearance of Blemishes • Sloughs off Dead Surface Cells • Smooths Skin

Powered by a 10% Multi Acid Blend to clarify the look of uneven tone and stubborn spots, revealing a smooth, renewed appearance.

Go Clear harnesses the power of hero acids to clarify uneven skin tone, target stubborn spots, and stimulate youthful skin renewal. This gentle yet powerful formula provides the refined and radiant complexion your skin clearly deserves. Go Clear reveals your skin's smooth, renewed appearance.

Ingredient Features and Benefits

- A concentrated blend of hydroxy acids with proven gentle effectiveness exfoliates to clear away dull, dead surface cells and promote healthy skin turnover.
 - The AHA (alpha hydroxy acid) Mandelic Acid is isolated from natural sources like apples, almonds, or cherries. It helps reduce the look of blemishes, fine lines and wrinkles, and uneven skin tone, and is ideal for sensitive skin.
 - The LHA (lipohydroxy acid) Capryloyl Salicylic Acid is a gentle derivative of the BHA (beta hydroxy acid) Salicylic Acid that's commonly sourced from willow bark. It has both astringent and exfoliating properties that weaken bonds between surface layer cells of the stratum corneum, sloughing off dead skin cells and clearing pores.
 - The PHA (poly hydroxy acid) Gluconolactone, derived from glucose, promotes skin's surface strength while helping increase skin cell turnover and improving the appearance of aging skin.
- Grain-derived Azelaic Acid is proven for its ability to clear blocked pores, visibly fade blemish marks, and lessen the appearance of redness and bumpy skin.
- Helps balance skin oils, tighten and tone the skin, and minimize the appearance of enlarged pores with the support of wild-harvested Witch Hazel.
- Used for its soothing properties and antioxidant qualities, Aloe Vera hydrates and helps seal moisture into skin.
- Natural Apple fragrance provides a fresh, clear scent.

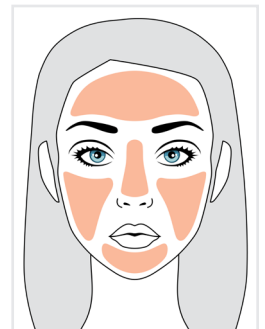

Ingredients

Water (Aqua), Propanediol, Grape Seed Oil, Azelaic Acid, Capryloyl Salicylic Acid, Mandelic Acid, Hamamelis Virginiana (Witch Hazel) Extract, Gluconolactone, Sodium Bicarbonate, Sucrose Stearate, Dimethicone, Aloe Vera, Sodium Cocoyl Glutamate, Xanthan Gum, Lecithin, Sclerotium Gum, Pullulan, Sodium Benzoate, Fragrance (Natural).

0.5 fl. oz. (15 ml)

Directions

Apply once or twice daily. Use alone or add to serum or moisturizer. For those with sensitive skin, test on a small area before applying to entire face. Avoid direct contact with eye area, eyelids, lips, and upper lip area.

Inspired by Nature, Refined by Science, Made Safe by Sisel, Loved by Skin

Natrience formulas are created on a foundation of natural ingredients that have been refined by technology and cutting-edge advancements in skin science into their most active and bioavailable components. Every ingredient meets our stringent Sisel Safe® standards with the highest levels of safety, purity, and integrity. These perfected ingredients are thoughtfully formulated into our Natrience skin care line where they are loved by you and your skin for their visible anti-aging benefits and for the health, vitality, and wellbeing of your skin.

FAQ

Q. How does Go Clear Multi Acid Clarifying Boost support skin health?

A. Cell turnover, the process of shedding dead skin cells and replacing them with new ones, is essential for maintaining healthy skin, as it helps to remove dead skin cells, unclog pores, and promote the growth of new skin cells. Go Clear is formulated with gently acids that promote healthy skin cell turnover and a healthy appearance.

Q. What are the key benefits of Go Clear Multi Acid Clarifying Boost?

A. Go Clear Multi Acid Clarifying Boost is formulated to clarify uneven skin tone, reduce the appearance of blemishes, slough off dead surface cells, and smooth skin.

Q. What are hydroxy acids and why is Go Clear Multi Acid Clarifying Boost formulated with various types?

A. Hydroxy acids represent a class of compounds which are used in cosmetic and therapeutic formulations to achieve a variety of beneficial effects for the skin. They have transformed skin care since their introduction decades ago. Various types of hydroxy acids have properties that make them more suitable for addressing or improving certain skin concerns. The AHA, LHA (BHA derivative), and PHA included in Go Clear are all gentle yet effective forms suitable even for sensitive skin. This unique combination of hydroxy acids provides vital skin support, including exfoliation, cell turnover, and anti-aging benefits.

Q. How is Azelaic Acid different from hydroxy acids?

A. Unlike most other acids, Azelaic Acid is not a hydroxy acid. It is a dicarboxylic acid naturally derived from grain and is milder than most AHAs and BHAs, so it's suitable for sensitive skin. Azelaic Acid helps exfoliate the skin, fades blemishes, evens skin tone, and lessens the appearance of redness and bumpy skin.

Q. What is the difference between a serum and a booster?

A. A serum is a blend of active ingredients designed for skin health, repair, protection, and comprehensive anti-aging benefits. A booster, like Go Clear, provides a targeted treatment with focus on the unique capabilities of high-concentration hero ingredients. Whether used before, after, or mixed with serums, boosters are added to your regimen to customize your routine, boost the activity of your skin care products, and help you quickly achieve the exact results you want.

Q. How do the hero ingredients in Go Clear Multi Acid Clarifying Boost work together to provide results?

A. The hero ingredients in Go Clear were thoughtfully chosen for their individual and combined ability to stimulate cell turnover, even skin's appearance, and decrease the look of redness or bumpy skin. Combining hydroxy acids is a great way to boost exfoliation, target different layers of the skin, improve the absorption of other skin care products, and address multiple skin concerns.

Q. How do I use Go Clear Multi Acid Clarifying Boost in my skin care routine?

A. Go Clear can be used individually, combined with Natrience Cell Anew Perfecting Serum or other Natrience boosters, or mixed with your Natrience moisturizer of choice.

Q. How many times a day should I use Go Clear Multi Acid Clarifying Boost?

A. Use Go Clear twice daily or as needed to target stubborn spots or rough, uneven skin texture.

Q. How soon will I see results from Go Clear Multi Acid Clarifying Boost?

A. Hydroxy acids in Go Clear can begin to work almost immediately to improve skin glow, and within days for a smoother texture and more radiant appearance. Clinical studies on hydroxy acids and Azelaic Acid show significant results within four weeks, with continued benefits over twelve weeks.

Q. How do I choose which serum or booster to add to my Natrience routine, and when to add them?

A. Consider adding one serum or booster at a time and allowing a two-week period for your skin to adjust before adding another. A good starting point is Cell Anew Perfecting Serum, formulated to support healthy skin and reduce multiple signs of aging. Then consider adding a booster that matches your main skin concerns: Go Bright to brighten skin and reduce the appearance of dark spots or discoloration; or Go Clear to reduce the appearance of blemishes, slough off dead surface skin and clarify skin tone; or Go Firm to plump skin, support and protect your skin's collagen and elastic network, and provide a firm, lifted appearance.
