CalciumK2™

Natural Bone Support

Strengthen your body with CalciumK2 Natural Bone Support, a comprehensive formula designed to promote bone and tooth health, support the nervous system, and help protect against calcium depletion. With three types of bioavailable calcium and essential vitamins K2 and D3, this unique formula supports bone density and arterial health.*

PRODUCT DESCRIPTION

CalciumK2 is crafted to counter declining levels of dietary calcium in modern diets. This advanced blend features three forms of highly bioavailable calcium—milk calcium, calcium citrate, and calcium gluconate. Along with essential minerals like magnesium and potassium to nourish bones, teeth, and the nervous system, each serving delivers nutrients that help maintain bone density and guard against calcium depletion.*

CalciumK2 additionally provides vitamins K2 and D3, key nutrients that help direct calcium into the bones where it belongs while supporting healthy arterial and soft-tissue function. These vitamins activate the carboxylation process, helping bones hold on to calcium and utilize it more effectively for strength and mobility. CalciumK2 offers a smart, complete approach to supporting bone vitality and whole-body wellness.*

DIRECTIONS

► Take 4 tablets with 8 –16 oz of water daily.

Store in a cool, dry place.

INGREDIENT FEATURES & BENEFITS

- **Bone & Tooth Health:** This easy-to-digest calcium supplement helps support bone and tooth health by addressing a potential lack of adequate daily calcium intake.
- **Skeletal & Circulatory Support:** Vitamins K2 and D3 encourage carboxylation, a process that allows bones to hold on to calcium more efficiently, supporting both the skeletal and circulatory systems.
- **Arterial Health:** Vitamin K2 helps limit the calcification of arteries by promoting the natural absorption of calcium for use in bone building instead of accumulating in soft tissues.

**These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.*

BONE HEALTH

Formulated with superior forms of calcium needed for bone health.

OPTIMAL ABSORPTION

Extracted whey calcium and vitamin D3 ensure proper calcium absorption.

BONE STRENGTH

Vitamin K2 helps calcium bind to your bones to support bone density.

MINERAL SUPPORT

Magnesium supports muscle and nerve function and potassium is essential for heart health.
