SiselSilver™ Micronized Colloidal Silver

Leverage advanced silver Ag_4O_4 technology with SiselSilver, a modern approach to traditional silver benefits, including natural antibacterial and antimicrobial properties. SiselSilver supports immune function and overall health with a 22 ppm concentration of micronized colloidal silver in reverse osmosis (RO) water for optimal purity.*

PRODUCT DESCRIPTION

SiselSilver™ Micronized Colloidal Silver is a liquid supplement designed to support the body's immune system and overall wellbeing. Silver has long been recognized for its antibacterial and antimicrobial properties.

SiselSilver is a unique and advanced silver formula that features Ag_4O_4 technology designed to enhance bioavailability. Made with RO water, this formula provides pure, highly bioavailable defense.*

Ag_4O_4 tetrasilver tetroxide technology consists of a silver core coated with Ag_4O_4 molecules—millions of silver oxide molecules bonded to a central silver particle. This allows the silver to maintain continuous particle function for optimal performance. This technology is probiotic-friendly and is supported by independent human clinical and toxicity studies, offering confidence in safety and efficacy.*

DIRECTIONS

Take 1 teaspoon up to three times daily. Not recommended for continuous or long-term use.

Does not require refrigeration after opening.
