# SiselSilver™ Whitening Toothpaste

## with Micronized Colloidal Silver

Brighten your smile with SiselSilver Whitening Toothpaste, created to reduce bacteria, remove stains, and support enamel. Combined with Micronized Colloidal Silver and  $\text{Ag}_4\text{O}_4$  technology, this fluoride-free toothpaste brightens teeth, promotes healthier gums, and helps improve overall oral hygiene, all with a fresh and minty flavor.

## PRODUCT DESCRIPTION

SiselSilver Whitening Toothpaste is a unique formula that supports balanced oral health using advanced  $\text{Ag}_4\text{O}_4$  silver technology. A colloidal silver core is surrounded by a micronized tetrasilver tetroxide coating, making the silver more bioavailable for thorough cleansing. This helps prevent bacteria buildup and promotes overall oral health and works effectively as a daily toothpaste.

In addition to advanced silver technology, this whitening toothpaste contains xylitol to neutralize acids and protect enamel, hydrolyzed casein to restore minerals to strengthen teeth, and sodium chlorite to break down organic compounds and surface stains for a naturally whiter smile. Peppermint, spearmint, and wintergreen add crisp flavor and keep breath fresh. This formula is free from fluoride, sulfates, and artificial additives.

## DIRECTIONS

► Apply a pea-sized amount of SiselSilver Whitening Toothpaste to your toothbrush and brush thoroughly. Do not swallow.

Brush your teeth daily after meals.

Safe for children to use but may require adult supervision.

## INGREDIENT FEATURES & BENEFITS

- **Cleaning & Prevention:** Micronized colloidal silver helps deeply cleanse and purify the mouth, supporting the prevention of bacterial growth, while xylitol reduces plaque acid buildup to maintain a neutral pH, protect enamel, and lower cavity risk.
- **Enamel Strengthening:** Hydrolyzed casein releases bioavailable calcium and phosphate ions to help repair and mineralize tooth enamel, enhancing its strength and resilience, protecting against decay and sensitivity.
- **Whitening:** Oxidizing properties of sodium chlorite help break down organic compounds on teeth and remove penetrating stains and discoloration for a whiter and brighter smile.
- **Fresh Breath:** Natural peppermint, spearmint, and wintergreen add flavor and help to freshen breath.
- **Fluoride Free:** Made without fluoride, sulfates, artificial sweeteners, or added colors.

### DEEP CLEAN

Thoroughly cleans while helping prevent dental issues.

### ENAMEL CARE

Strengthens and protects teeth for long-lasting oral health.

### WHITENING

Removes surface stains for a naturally brighter, radiant smile.

### FRESH BREATH

Keeps mouth feeling clean and breath fresh all day.
