TSX™

Advanced Telomere Support

Support your body's fight against aging with TSX™ Advanced Telomere Support. This powerful formula helps maintain and lengthen telomeres, protecting your DNA and promoting cellular health. TSX encourages healthy cognitive functions, DNA replication, and may help you feel younger and more vibrant.*

PRODUCT DESCRIPTION

TSX, or “Telomere Support Xtreme,” works to assist in maintaining and lengthening the telomeres in your cells which may slow the aging process and help you feel youthful. Telomeres are strands of DNA at the ends of your chromosomes that act like caps to protect genetic data and may help regulate cell division. Telomeres can become frayed and shortened with age, and TSX works to fight against that deterioration.*

TSX is formulated to support telomere health, DNA replication, cellular health, and cognitive function. Bacopa may help with memory and cognition, and the proprietary blend provides super nutrients to protect cellular and telomere health.*

DIRECTIONS

► Suggested use by age range:

18-50 years: 1-2 capsules a day

50-70 years: 2-3 capsules a day

70+ years: 3-4 capsules a day

Store in a cool, dry place.

INGREDIENT FEATURES & BENEFITS

- **Telomere Support:** A proprietary blend of fruits and vegetables help to strengthen telomeres on the ends of chromosomes and fight against unwanted deterioration of telomeres that may lead to aging.*
- **Cognitive Function:** Bacopa supports healthy cognitive functions and brain support which can help with memory, learning, focus, and concentration.*
- **DNA Health:** This blend of ingredients can promote healthy telomeres which may support cell regulation and division. A powerful blend of fruits and vegetables provides super nutrients that support telomeres that may be exposed to free radicals.*
- **Healthy Aging:** TSX is designed with ingredients that support slow and healthy aging, so you can feel young and vibrant.*

TELOMERE SUPPORT
Fights against unwanted telomere damage.

COGNITION
Supports brain health, memory, focus, and cognition.

DNA REPLICATION
Encourages healthy cell health and DNA replication.

HEALTHY AGING
Promotes slow and healthy aging, so you can feel young and vibrant.
